## Preservation Order for removing drywall:

Judge Fallon has issued a Preservation Order providing details how evidence is to be preserved when removing drywall. If you are either in the process of removing or are planning on **removing your tainted drywall** it is important to follow the Preservation Order in order to protect your claim. If you do not follow this, you could **lose your rights to any claims**. Check with your attorney but I would do this whether you or your builder is doing the work. The Preservation Order is an attachment. Click the link at the bottom left of this newsletter to open.
