**Subject:** Senate Hearings on Chinese Drywall

The link below is to the senate hearings from last Thursday. Senators and others provided overviews and reviewed current known information. Governmental agencies including Florida DOH, CPSC, EPA and CDC provided updates on information they currently have and their status of handling the issue. It's 115 minutes long and doesn't start until about 18 minutes into it. It is very informative and satisfying in the sense that the urgency and magnitude are understood by the key agencies and officials. However, the time for testing is slowing things down. There was a general consensus that the federal govt needs to be involved as well as provide a funding solution.
