Subject: Chinese Drywall - Condo Association, Unit Owners and the Need for the Triple Win

The Trials and Tribulations of a Condo Association Dealing with Chinese Drywall (and it could all be fixed with the Triple Win)

Note from the Sender

Greetings,
To the right is an email I sent to politicians regarding my condo association dealing with Chinese drywall. I have been meaning to write up what we have been going through and finally got around to doing it. It is a miserable story that the politicians need to hear. I live by the philosophy that you should always present a solution when presenting a problem so I included a great write up by Ron Bailey - The Triple Win. If you only have time to read one, read his. Links to each are below:

[Promenade's Story \(The trials and tribulations of a condo association dealing with cdw\)](#)

Copy of Email to Politicians:

Greetings, I hope this email finds you doing well. I have included many congressman, senators, local councilmen and other political leaders that I had email addresses for and felt it was appropriate to send this to you. Some are cc'd for your information and some used to be in office and I only hope you forward this to those who may have some interest in the issue. I used personal email addresses for some so I didn't want to show all of the email addresses.

The attached "Promenade Story" is a compilation that I worked hard to put together in order to share our story about Chinese drywall and our condo association. To help in review, I underlined the key topics for each paragraph. I hope that you will take the time to read it and understand the issues we are being challenged with. More importantly, please read the [Triple Win Solution](#) and use your respective influences to make some things happen before it is too late. This is a road map to turn lemons into lemonade at a time when so many are thirsty. You were elected for a reason and a faith that you have the strength and power to make things happen when needed. Right now, it is very much needed.

In case you are not aware the Chinese Drywall Caucus will be holding a meeting on April 14th from 4 till 5pm in Washington. This meeting is not open to the public but Congressman/Senators and their staff are invited. I encourage you to get involved somehow. You can RSVP to:

(I removed this info since it is not open to public and they requested that I not send it out)

I am spending about 2 hours a night using empty condos to run various field experiments. I am using XRF to measure sulfur corrosion in ug/cm2 to see if various temporary tricks and treatments work on a temporary basis and to what extent. I have samples of almost every type of drywall that I am also experimenting with. I am more than happy to be a resource or share any information for the cause.

On behalf of all the members of my community association, we thank you for any time and attention you

can give this.
